# NEXWLÉLEXM (BOWEN ISLAND)

- The Islands Trust council acknowledges that the lands and waters that encompass the Islands Trust Area have been **home to Indigenous peoples** since **time immemorial** and honours the **rich history, stewardship, and cultural heritage** that embody this place we all call home.
- The Islands Trust council is committed to establishing and maintaining mutually **respectful relationships** between Indigenous and non-Indigenous peoples. Islands Trust states a **commitment to Reconciliation** with the understanding that this commitment is a **long-term relationship-building and healing process**.
- The Islands Trust council will strive to **create opportunities for knowledge-sharing** and understanding as people come together to **preserve and protect** the special nature of the islands within the **Salish Sea**.

What stands out from last session?  
What have you tried/ want to try?  
What are you noticing?  
What questions are coming up?

# How do we DO inclusion?

How do we include  
people who are  
different

How do we teach  
to diversity?

## The cupcake model

<b>What do students need to do? Skills/Process Goals</b>		<b>I can</b>
<b>What do students need to do? Skills/Process Goals</b>		<b>I can</b>
<b>Who do student need to be? Attitudes</b>	<b>I can become/ I am...</b>	

<b>Big Idea:</b> Machines are used for many purposes in our daily lives when we need to transfer energy into motion or move materials in a controlled way.	<b>Our Unit Questions:</b> How is energy transferred in mechanical devices? How do mechanical devices provide for controlled application of energy in ways that are efficient, effective and responsible?
--	---

<b>Content vocabulary to know and use:</b> mechanical devices, structures, functions, machines, subsystems, component parts, system, force, energy, transmission, mechanical system, social contexts, environmental contexts	<b>Skill vocabulary to know and use:</b> initiate, plan, variables, investigating, researching, data, qualitative, quantitative
---	--

<b>Unit Goals: Curricular Language</b>	<b>Student Friendly Language</b>
--	----------------------------------

<b>STS Outcomes</b>	Illustrate the <b>development of science and technology</b> by <b>describing, comparing, and interpreting mechanical devices</b> that have been <b>improved over time</b>	<b>STS Outcomes</b>	I know how science and technology has impacted the development of <b>mechanical devices</b> I know how <b>mechanical devices</b> have improved over time
	Analyze <b>machines</b> by describing the <b>structures and functions</b> of the <b>overall system, the subsystems</b> and the <b>component parts</b>		I know the <b>structures</b> and <b>functions</b> of different <b>machines</b> I know how <b>subsystems</b> and <b>component parts</b> work together in an overall <b>system</b>
	Investigate and describe the <b>transmission of force and energy</b> between parts of a <b>mechanical system</b>		I know how the <b>force</b> and <b>energy</b> moves ( <b>transmission</b> ) between the different parts of a <b>mechanical system</b>
	Analyze the <b>social and environmental contexts</b> of <b>science and technology</b> , as they apply to the development of <b>mechanical devices</b>		I know how the development of <b>mechanical devices</b> impacts <b>social</b> and <b>environmental contexts</b>

<b>Targeted Skill Outcomes</b>	<b>Initiating and Planning:</b> Ask questions about the relationships between and among observable variables, and <b>plan investigations</b> to address those questions	<b>Targeted Skill Outcomes</b>	I can <b>initiate</b> and <b>plan</b> by: <ul style="list-style-type: none"> <li>asking questions about how things (<b>variables</b>) are related to each other</li> <li><b>investigating</b> and <b>researching</b> into questions I ask</li> </ul>
	<b>Analyzing and Interpreting:</b> Analyze <b>qualitative and quantitative data</b> , and develop and assess possible explanation		I can <b>analyze</b> and <b>interpret</b> by: <ul style="list-style-type: none"> <li>using my senses to understand and explain <b>data (qualitative)</b></li> <li>using amounts, numbers and values to understand and explain <b>data (quantitative)</b></li> </ul>

<b>Targeted Attitudes</b>	Interest in Science: <b>Show interest</b> in science-related questions and issues, and <b>pursue personal interests and career possibilities</b> within science-related fields	<b>Targeted Attitudes</b>	I can be interested in science by: participating, engaging in discussion, willing to complete assignments and tasks, asking questions, learning about science for fun, finding ways to connect to science topics, getting creative in science, knowing why science could be useful to life in the future/ possible careers in science)
---------------------------	--	---------------------------	--

<p><b>Focus Questions:</b> How have humans attained a <u>presence</u> in space? What technologies have been developed and on what scientific ideas are they based? How has the development of these <b>technologies</b> contributed to the <b>exploration, use and understanding</b> of space and to <b>benefits</b> on Earth?</p>	<p><b>Student Friendly Language:</b> How do humans go to and interact with space? How has technology been used to understand and explore space? How does understand space help to understand the Earth?</p>
--	---

Vocabulary to know and use:	
Unit Goals: Curricular Language	Student Friendly Language
<p><b>STS</b> Investigate and describe ways that human understanding of Earth and space has depended on technological development by:</p> <p>Identify problems in developing technologies for space exploration, describe technologies developed for life in space, and explain the scientific principles involved</p> <p>Describe and interpret the science of optical and radio telescopes, space probes and remote sensing technologies</p> <p>Identify issues and opportunities arising from the application of space technology, identify alternatives involved, and analyze implications</p>	<p><b>STS</b> I can explore and describe how humans use and need technology to understand the Earth the space</p> <p>I can understand and describe technologies that have been developed for exploring space and for life in space</p> <p>I can find problems in the technologies that have been and are being developed</p> <p>I can explain the science of some specific technologies</p> <p>I can find problems and see potential in studying space and space technology</p>
<p><b>Skills Outcomes</b> Initiating and Planning: Ask questions about the relationships between and among observable variables, and plan investigations to address those questions</p> <p>Communication and Teamwork: Work collaboratively on problems; and use appropriate language and formats to communicate ideas, procedures, and results</p>	<p><b>Skills Outcomes</b> I can <b>initiate</b> and <b>plan</b> by</p> <ul style="list-style-type: none"> <li>o asking questions</li> <li>o investigating and researching to find answers to those questions</li> </ul> <p>I can communicate and work as a team by:</p> <ul style="list-style-type: none"> <li>o solving problems and communicating ideas</li> </ul>
<p><b>Attitude Outcomes</b> Scientific Inquiry: Seek and apply evidence when evaluating alternative approaches to investigations, problems, and issues (e.g., seek accurate data that is based on appropriate methods of investigation; consider observations and ideas from a number of sources before drawing conclusions)</p> <p>Stewardship: Demonstrate sensitivity and responsibility in pursuing a balance between the needs of humans and a sustainable environment (e.g., consider immediate and long-term consequences of personal and group actions; objectively identify potential conflicts between responding to human wants and needs and protecting the environment)</p> <p>Collaboration: Work collaboratively in carrying out investigations and in generating and evaluating ideas (e.g., work with others to identify problems and explore possible solutions; share observations and ideas with other members of the group, and consider alternative ideas suggested by other group members; share the responsibility for carrying out decisions)</p>	<p><b>Attitude Outcomes</b> I can be a scientific researcher by:</p> <ul style="list-style-type: none"> <li>o finding evidence to answer questions and solving problems</li> </ul> <p>I can show stewardship by:</p> <ul style="list-style-type: none"> <li>o Finding out about and understanding ideas from different perspectives, including stakeholders, that is connected to a problem or event</li> </ul> <p>I can collaborate by:</p> <ul style="list-style-type: none"> <li>o working together to build ideas and solve problems</li> </ul>
<p><b>Competencies</b> <b>Critical Thinking</b></p> <ul style="list-style-type: none"> <li>- questioning and analyzing evidence, assertions, or assumptions</li> <li>- demonstrating intellectual integrity, fairness, and open-mindedness</li> </ul>	<p><b>Competencies</b> I can be a critical thinker by:</p> <ul style="list-style-type: none"> <li>o questioning what I know by understanding evidence from multiple perspectives</li> <li>o being open minded to learn new things and to change my thinking and my ideas based on what I am learning (growth mindset)</li> </ul>

**Backwards Design Plan: Socials 20-4**  
**Planning Team:**

<b>Big Idea:</b> Students will examine the effects of nationalism, ultranationalism and the pursuit of the national interest.	<b>Our Unit Questions:</b> What is nationalism? Why is it important? What are the effects of nationalism?
---	---

Vocabulary to know and use:			
Unit Goals: Curricular Language		Student Friendly Language	
Values &	20-4.2a appreciate that <b>nations</b> and states pursue the <b>national interest</b>	Values &	I understand why <b>nations</b> try and build <b>national interest</b>
	20-4.2b appreciate multiple <b>perspectives</b> related to the pursuit of the <b>national interest</b>		I understand why it is important to include different <b>perspectives</b> when building <b>national interest</b>
Knowledge & Understanding	20-4.2c explore a range of <b>expressions</b> of <b>national interest</b>	Knowledge & Understanding	I learn about different ways that <b>national interest</b> is shown or expressed
	20-4.2d explore the <b>relationship</b> between <b>nationalism</b> and the pursuit of the <b>national interest</b>		I can learn about how <b>nationalism</b> and building <b>national interest</b> connects to each other
	20-4.2e examine <b>similarities and differences</b> between <b>nationalism</b> and <b>ultranationalism</b>		I can look at how <b>nationalism</b> and <b>ultranationalism</b> are the same and different
	20-4.2f identify the effects of <b>nationalism</b> and <b>ultranationalism</b> during times of <b>conflict</b>		I can tell the <b>effects</b> of <b>nationalism</b> and <b>ultranationalism</b> during <b>conflict</b>
	20-4.2g examine <b>ultranationalism</b> as a cause of <b>genocide</b>		I can look at how <b>ultranationalism</b> can lead to <b>genocide</b>
	20-4.2h examine the <b>relationship</b> between <b>nationalism</b> and <b>national self-determination</b>		I can look at how <b>nationalism</b> and <b>national self-determination</b> connect to each other

**Biology 20-1 | Energy and Matter Exchange in the Biosphere**

<p><b>Our Unit Questions</b></p> <ul style="list-style-type: none"> <li>• How are carbon, oxygen, <u>nitrogen</u> and phosphorus cycled in the biosphere?</li> <li>• How is the flow of energy balanced in the biosphere?</li> <li>• How have human activities and technological advances affected the balance of energy and matter in the biosphere?</li> </ul>
--

General Learning Outcome: Students will understand the constant flow of energy through the biosphere and ecosystems.		
Unit Goals: Curricular Language	Student Friendly Language	
<p><b>Knowledge</b></p> <p><b>20–A1.1k</b> Students will: explain, in general terms, the one-way flow of energy through the biosphere and how stored energy in the <b>biosphere</b>, as a system, is eventually “lost” as heat</p> <p><b>20–A1.2k</b> Students will: explain how energy in the biosphere can be perceived as a balance between both photosynthetic and chemosynthetic activities and cellular respiratory activities</p> <p><b>20–A1.3k</b> Students will explain the structure of ecosystem trophic levels, using models such as food chains and food webs</p> <p><b>20–A1.4k</b> Students will explain, quantitatively, the flow of energy and the exchange of matter in aquatic and terrestrial ecosystems, using models such as pyramids of numbers, <u>biomass</u> and energy</p>	<p><b>Knowledge</b></p> <p>I know how energy is used in a biosphere (stored, transferred, lost)</p> <p>I know that energy in different biospheres is balanced and cycles</p> <p>I know how biospheres are interconnected</p> <p>I know what an ecosystem is and how it is organized</p> <p>I know how energy moves in an ecosystem</p> <p>I know how to represent the movement of energy in ecosystems using a model</p>	
	<p><b>STS</b></p> <p><b>20–A1.1sts</b> Students will: explain that the process of scientific investigation includes analyzing evidence and providing explanations based upon scientific theories and concepts</p>	<p><b>STS</b></p> <p>I can connect what I am learning about biospheres to real life examples and events</p>
	<p><b>Specific Outcomes for Skills</b></p> <p><b>Initiating and Planning</b></p> <p><b>20–A1.1s</b> Students will: formulate questions about observed relationships and plan investigations of questions, ideas, problems, and issues</p> <p><b>Performing and Recording</b></p> <p><b>20–A1.2s</b> Students will: conduct investigations into relationships among observable variables and use a broad range of tools and techniques to gather and record data and information perform an experiment</p> <p><b>Analyzing and Interpreting</b></p> <p><b>20–A1.3s</b> Students will: analyze data and apply mathematical and conceptual models to develop and assess possible solutions</p>	<p><b>Specific Outcomes for Skills</b></p> <p>I can <b>initiate</b> and <b>plan</b> by:</p> <ul style="list-style-type: none"> <li>• by asking questions about what I observe in my environment</li> <li>• by making predicting based on what I observe</li> </ul> <p>I can <b>investigate</b> and <b>record my observations</b> by:</p> <ul style="list-style-type: none"> <li>• using different tools and techniques to gather data</li> <li>• complete an experiment</li> </ul> <p>I can <b>analyze</b> and <b>interpret</b> by:</p> <ul style="list-style-type: none"> <li>• looking for patterns in my data to help me understand what is happening</li> <li>• connecting my data to other scenarios and contexts</li> <li>• coming up with some possible solutions or explanations for what is happening</li> <li>• organizing and displaying my data in ways that make sense to me</li> </ul>
	<p><b>Communication</b></p> <p><b>20–A1.4s</b> Students will: work collaboratively in addressing problems and apply the skills and conventions of science in communicating information and ideas and in assessing results</p>	<p>I can <b>communicate</b> my findings by:</p> <ul style="list-style-type: none"> <li>• using SI units and Sig Digs</li> <li>• presenting my findings so it makes sense to others (modes representation)</li> </ul>

Grade: 20-2	Subject Area: Math	Planning Team: Kim and team	
<b>Big Idea(s):</b> What do I need to understand? I understand <b>algebraic</b> and <b>graphical</b> reasoning through the study of <b>relations</b>		<b>Unit Guiding Question(s):</b> What is <b>algebra</b> and why is it useful? How can we see and understand the <b>relationships</b> between given <b>algebraic scenarios</b> ? How are <b>algebraic equations</b> and graphs connected? How can I use graphing to show algebraic equations? How can I understand an algebraic scenario by looking at information in a <b>graph</b> ?	
<b>Key Vocabulary:</b> algebra, relationships, algebraic scenarios, algebraic equations, graph, quadratic function, vertex, intercepts, axis of symmetry, domain, range, factors, factoring, ordered pairs, coordinates, x, y, polynomials, roots, quadratic equation, substitution, verify			
		<b>Curricular Language</b>	<b>Student Friendly Language</b>
<b>What do students need to know?</b> <b>Specific Outcome 1.</b>	Demonstrate an understanding of the characteristics of <b>quadratic functions</b> , including: <ul style="list-style-type: none"> <li>• vertex</li> <li>• intercepts</li> </ul> domain and range axis of symmetry.		I know what <b>quadratic functions</b> are I know that quadratic functions have a <b>vertex, intercepts, and an axis of symmetry</b> I know that quadratic functions are defined by their <b>domain and range</b>
<b>What do students need to do?</b> <b>Specific Outcome 2.</b>	<b>Solve problems</b> that involve <b>quadratic equations</b> .		I can solve problems that use <b>quadratic equations</b>
<b>Who do student need to be?</b> <b>Mathematical Processes</b>	CN, PS, T, V, C, R		I can make connections to help me understand I can problem solve in math I can use technology as a tool I can visualize as a strategy to help me understand I can communicate my thinking I can reason by justifying my thinking

Name:

Date:

**Unit Guiding questions:**  
What is algebra and why is it useful? How can we see and understand the relationships between given algebraic scenarios? How are algebraic equations and graphs connected? How can I use graphing to show algebraic equations? How can I understand an algebraic scenario by looking at information in a graph?

Learning Outcomes	My evidence of learning	Showing my Learning			I Need Support	I Need Challenge
	Actvtivities/ tasks	concrete	pictorial	abstract		
<ul style="list-style-type: none"><li>I know what quadratic functions are</li><li>I know that quadratic functions have a vertex, intercepts, and an axis of symmetry</li><li>I know that quadratic functions are defined by their domain and range</li></ul>						
<ul style="list-style-type: none"><li>I can solve problems that use quadratic equations</li></ul>						

# Backwards Design Big Ideas:

- Every curriculum has **curricular goals**
- We need to **choose goals** to teach for every **unit**
- We organize goals around a **big idea/question**
- We need to **translate** those goals into **student friendly language**
- **Students** need to **know the goals**
- Learning activities are **EVIDENCE of learning**
- We **evaluate goals** NOT activities
- Student choose their **best examples** of evidence (triangulation)
